1. Applicant's election without traverse of "Species I," upon which "claims 1, 2, 10, 12, 16-20, and 23-31" are identified as corresponding thereto, in the reply filed on 12 August 2005 is acknowledged. Accordingly, claims 3-9, 11, 13-15, 21, and 22 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to one or more non-elected inventions/species, there being no allowable generic or linking claim.

2. Upon further consideration, restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 2, 10, 12, and 16-20, drawn to a "disk drive motor"/"disc drive motor", classified in class 360, subclass 99.08.
- II. Claims 23-31, drawn to a "fluid dynamic bearing", classified in class 384, subclass 100.

3. The inventions are distinct, each from the other because of the following reasons:

Inventions of groups I and II are related as combination and subcombination, respectively. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not require for "a constant pressure region downstream of the

obstruction". The subcombination has separate utility such as usable in a motor not utilizing a "disk"/"disc".

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Donald R. Green on 11 October 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
